SQL Code

```sql
CREATE TABLE Student1 (
    ID INT,
    Name VARCHAR(20),
    Marks INT
);

INSERT INTO Student1 VALUES
(1, 'Sushanth', 85),
(2, 'Diganth', 75),
(3, 'Deepak', 65);

CREATE TABLE Student2 (
    ID INT,
    Name VARCHAR(20),
    Marks INT
);

INSERT INTO Student2 VALUES
(4, 'Chiranth', 90),
(5, 'Rahul', 80),
(6, 'Kiran', 70);

SELECT * FROM Student1
WHERE Marks BETWEEN 70 AND 90;

SELECT * FROM Student1
WHERE Name IN ('Sushanth', 'Deepak');

SELECT * FROM Student1
WHERE Name LIKE 'S%';

SELECT * FROM Student1
WHERE Marks IS NOT NULL;

SELECT Name, Marks FROM Student1
UNION
SELECT Name, Marks FROM Student2;
```

Output:

```
+------+----------+-------+
| ID   | Name     | Marks |
+------+----------+-------+
|    1 | Sushanth |    85 |
|    2 | Diganth  |    75 |
+------+----------+-------+
+------+----------+-------+
| ID   | Name     | Marks |
+------+----------+-------+
|    1 | Sushanth |    85 |
|    3 | Deepak   |    65 |
+------+----------+-------+
+------+----------+-------+
| ID   | Name     | Marks |
+------+----------+-------+
|    1 | Sushanth |    85 |
+------+----------+-------+
```

ID	Name	Marks
1	Sushanth	85
2	Diganth	75
3	Deepak	65

Name	Marks
Sushanth	85
Diganth	75
Deepak	65
Chiranth	90
Rahul	80
Kiran	70
